

ReliaGear™ lighting panelboards

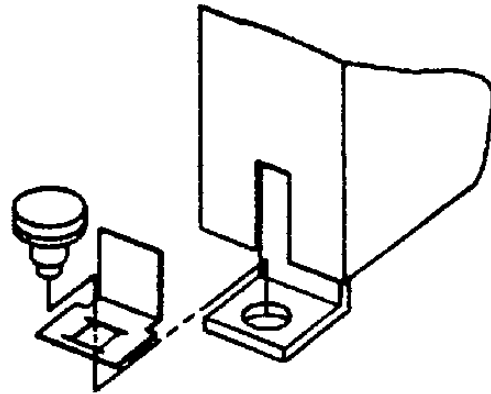

Installation of captive screw kit

For use with THQB and THHQB circuit breakers without factory installed captive screws.

This kit is to be used for mounting THQB and THHQB circuit breakers in ReliaGear panelboards. Do not attempt to mount a circuit breaker without first installing the captive screw and mating retainer.

Installation Instructions

- Step 1. Assemble retaining clip to circuit breaker by inserting the clip into circuit breaker adjacent to the connection strap as shown.
- Step 2. Assemble screw by threading into retaining clip with a screwdriver. Be certain that the screw is fully threaded into the retaining clip.
- Step 3. Install circuit breaker in panelboard.
