

# Power Break® II into a Power Break I Retrofit Kit

Many users of Power Break I circuit breakers would like to upgrade to a newer breaker with more features. The new Power Break II Retrofit Kit allows them to do just that, with only minor modifications.

Everything needed to put a new Power Break II circuit breaker into a fixed mount Power Break I slot is included. Among other benefits, the Power Break II upgrade will feature the EntelliGuard® TU trip unit with advanced Waveform Recognition Instantaneous and RELT.

Power Break II retrofit kits are for fixed mounted breakers only. For drawout breakers, contact GE Engineering Services at 1-888-GE4-SERV.

The kits are designed, tested and approved by GE. The Power Break II breaker maintains its UL rating.

- trim plate
- door cut-out diagrams
- mounting hardware
- line/load copper extenders (1600A, 2000A)
- line shield (1600A, 2000A)
- drilling templates (1600A, 2000A)
- instruction manual

Frame Rating(s)	Operation	Kit Cat. No.*
800A	Manual/Electric	SSF08TPCC
1600A	Manual/Electric	SSF16TPCC
2000A	Manual/Electric	SSF20TPCC
2500A, 3000A, 4000A	Manually Operated	SSF40TPCCM
	Electrically Operated	SSF40TPCCE

\*For kits shipped with breaker. For kits *without* breaker, add "R" to catalog number.
