

Entellisys System Test Kit

Quick Start Guide

Perform the following steps when using the ETSTESTKIT03 software on a computer for the **first time**. This step will only need to be done once for the computer that will be used with the test kit.

1. Insert the USB drive that is included with the ETSTESTKIT03 enclosure.
2. Find the USB drive contents on the computer and run the installation file “*Entellisys System TestKit Installer Version 5.0*”
3. On **first run**, the following dialog will appear. Make note of the *Site Code* and *MID*.

Site code	MID
B7BC9450	7DF9-C97B-B2F2-D5EC
Activation code	

4. Contact GE Post Sales Service (either by phone or email) with shop order number or order number for the Activation Code.

entellisys.lvs.pss@ge.com

Phone (toll free): **1-888-437-3765**

5. Enter activation code and ensure that the unlock application radio button is highlighted.
6. Click on *Continue* and start using the test kit. Refer to DEH-503 for more detailed instructions.
