

# Low Voltage Switchgear Remote Racking Devices

Now maintenance and service personnel can rack drawout breakers in low voltage switchgear in and out remotely — from as far away as 30 feet — for the greater safety and peace of mind that's been available in medium voltage gear for years.

Remote Racking Devices for the following breakers:

- WavePro™/EntelliGuard® (Entellisys®) Cat. No. WPEGRRLV
- EntelliGuard G Cat. No. EGGRRLV
- AKR Cat. No. AKREGRR

Available for new lineups or retrofits. WavePro/EntelliGuard (Entellisys) Breakers require a modification kit for breakers above 2000A. EntelliGuard G requires a steel tube modification to OEM cassettes. AKD-20 includes the steel tube. AKR requires a small breaker and door modification.
