

Integrated Switchboard Planning Tool

This planning sheet provides dimensions for the most common integrated switchboard configurations that include power panels, transformers and lighting panels. Other configurations are available and can include lighting contactors, A-Series lighting control panels, TVSS, customer-supplied devices and customer metering.

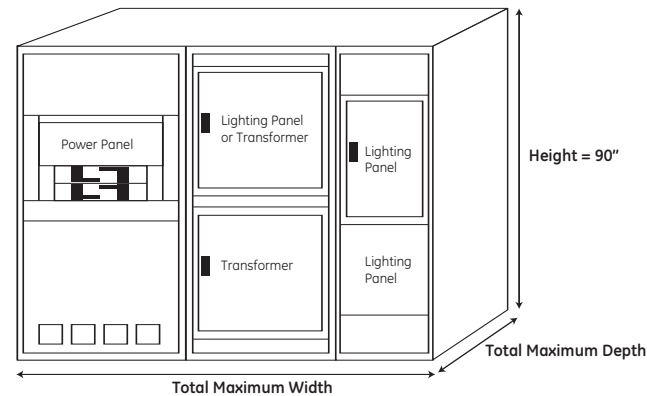

2-Section Configuration

For Power Panels & Lighting Panels

3-Section Configuration

For Power Panels, Transformers & Lighting Panels

3-Section Dimensions (inches)

Power Panel		Transformer			Lighting Panel		Total (maximum)	
Width	Depth	KVA	Width	Depth	Width	Depth	Width	Depth
45	25	15, 30	30	25	25	25	100	25
45	30	45, 75	35	30	25	30	105	30
45	30	112.5, 150	40	30	25	30	110	30

- Notes:
- Actual dimensions may be smaller than shown, depending on your specific requirements.
 - For information on other configurations, contact your Account Manager, visit www.geelectrical.com or email isb@ge.com.
