

Single phase transformers update

ABB's 1PH Transformers have been updated to allow for a 120x240V secondary option for 2 wire systems and a 120/240V for 3 wire systems. Please see the tables below to select the appropriate transformer for your application. If you are not sure, select the 120/240V secondary transformers as they can serve both 2 wire and 3 wire systems and are the industry standard.

Primary	Secondary	Catalog #	Description	MPG	MG2
