

## CERTIFICATE

We, *GE Power Protection group  
acting through its affiliate  
GE Industrial Belgium - Nieuwevaart 51 - B-9000 Gent - Belgium*

declare that the product/equipment:

*Brand: GE  
Product: Glass-reinforced unsaturated polyester grade V5010*

provided that it is installed, maintained and used in the application for which it is made, with respect of the "professional practices", relevant installation standards and manufacturer's instructions,

is recognized by Underwriters Laboratories Inc. and meets the requirements for outdoor use as per UL746C §25 "Ultraviolet Light Exposure".  
Field tests in a temperature climate have proved the enclosures withstand outdoor exposure for at least 20 years, without affecting the functional properties.  
If the surface aspect is important, or if the enclosures are to be used in unprotected areas with high solar radiation, we recommend the use of a protective coating, prolonging the expected lifetime with 10 years.
