

GE Consumer & Industrial  
Electrical Distribution

# Faster always wins.

You didn't really believe the tortoise won, did you? Fast and smart beat slow and steady every time. And GE **Integrated Switchboard** installations are as much as 75% faster than that for separate electrical room components.

Hours saved turn into dollars pocketed. In a typical electrical room involving 1 power panel, 4 lighting panels, 2 transformers and 2 lighting contactors, you might save 86 hours of installation time and \$2,600 on total installed cost.

There are many variables, so run the numbers yourself. Go to [www.geelectrical.com](http://www.geelectrical.com), click on the ISB Savings Calculator, enter your data, and instantly see how much you can save – and how quickly you can hop to your next job!
